

# Dwaine Matthew

WEB DEVELOPER

## PROFILE

*Ambitious Full-Stack Developer with a huge passion for building frontend applications. Ready to utilize my skills and enthusiasm to deliver products that exceed the expectations of the client.*

## PROJECTS

### Movie App - [github](#)

*Mobile first application that pulls data from a movie database*

- Designed a sleek and fully responsive website with the ability to filter over 600,00 movies and TV series by genre or search for media by name.
- Tools used: JavaScript, React, Material-UI, Pagination, CSS

### Water My Plants API - [github](#)

*Single page application to remind user when to water their plants*

- Built a backend server using Node and SQLite to store user and plant data. Used bcrypt.js to hash passwords for added security. Collaborated with the frontend team to ensure all calls and responses functioned correctly. Added ability for users to store pictures of each plant.
- Tools used: Node.js, Express, RESTful API, SQL, JavaScript, Postgres, Heroku

### Secret Family Recipe - [github](#)

*Responsive website for storing and editing recipes*

- Developed a website that allows users to add, edit and delete recipes from the database. Used react-axios to make requests to the server.
- Tools used: React, HTML5, CSS3, Axios, JavaScript, Bootstrap

## EDUCATION

### Lambda School, Full-Stack Web Development

2020 - 2021

A 14 months long intensive program focused on gaining technical programming skills in front and backend web development, including building data structures and algorithms with Python.
